Xpayment 1.38
Modular Gateway and Modular Modules for Payment Transactions
Sponsored by [Chronolabs Co-op](#)

Xpayment is a module that allows you to write customised payment gateways, as well as having modular hooking stratum in the module with a second plugin section for modules and responses to invoices.

Complete with Gateway plugins you can easily customise this module for your payment gateway in a few files. There is many benefits to using xpayment as the standard for intergrating payment into your modules. It has a modular plugin system for gateway invoice responses so your module will know when an items has been paid for.

This is the new standard for gateway and payment solutions with XOOPS.
