

[x2 theme for xoops 2.0 totally upgraded! - Themes](#)

NEWS_PDF_AUTHOR: w4z004

NEWS_PDF_DATE: 2003/2/5 9:24:32

Later of work a ton , and with the coloboration of aitor and a little of clean up of eric, the new X2 Theme are enhanced.

well, [\[HERE\]](#) can download the x2t theme

[\[HERE \]](#) can see the x2t theme working. (not added the double columns.

the instalation is really simple :

- 1 - Unzip in a local hard disk.
- 2 - Be sure that the xoops 2.0 have all the modules installed.
- 3 - Go to the theme manager and browse the theme (x2t[xx-xx-2003].tar.gz)in you local hdd, proceed.
- 4 - into preferences change the theme to x2t theme.
- 5 - enjoy.

New features :

NEW LAYOUT: when install the theme go to see that the center-center blocks go to the bottom (many people request this) and the center-left and center-right remain in the top, with the module info in the middle.

OLD LAYOUT: into the EXTRAS dir too have a skin.html file that if you replace into the theme skin with copy and paste obtain that the center-center blocks appear in the top (like how the old x2t theme).

NEWS IN TWO COLUMNS: later of installed the theme with the theme manager into the news need upload or copy and paste the files news_index.html and news_item.html that are into the EXTRAS dir to the respective places and obtain a news with 2 columns.
