Flowplayer 1.10 - HTML5, Silverlight & Flash Secure Video Solution

Community Release by [FibreDyne Pty Ltd](#)

Flowplayer 1.10 is a module for display securely video streams. It allows various customisable options like blocks and video stream content to allow for video streams to list themselves within your XOOPS Site. It allows for both a HTML5 Video playback, Silverlight or Flash playback of RTMP, RTSP, Mp4 and other forms of streams and flat files.

The players can be selected based on User Agents so you can play a video on a page all the time depending on browser compatibility or mobile phone.

Watch this introductory video on Flowplayer 1.02:

XOOPS Offers a range of choice and solutions the following module includes these features:

Features:

- HTML5 Video Player
- Silverlight Video playback
- User Agent Selection of Players
- XOOPS 2.5 Gui
- RTMP Services like Wowza and Matrixstream
- Administration for Listing Video Streams
- Customisable ID References
- Video Stream Block
- Width and Height Customisation
- AJAX Video Stream Loading so your URL are not exposed
- Minute by Minute Passkey protection

- Forcable JQuery
- Customiable Encryption Salt

Why work your but off when you can create a module from this freely distributed listing module today!

Requirements:

- XOOPS 2.5
