Plugins to pick up the RSS feeds of individual modules - Modules

NEWS_PDF_AUTHOR: timgno

NEWS_PDF_DATE: 2012/2/27 21:19:24

The creation of a new module that collects the RSS feed module and display them either individually or in groups in the reader software or internet. Has an administration side to create the plugin directly in contrast to other modules that are created manually for each module.

Trial to test on your computer or virtual server and operating system to verify the successful creation of the plugin.

The modules that will work with this module are only those created with classes that extend the object class from the 2.5.0 version of xoops.

Warning: **only for test**
