

Xoops Partners 2.0 Beta 1 ready for testing - Modules

NEWS\_PDF\_AUTHOR: Mamba

NEWS\_PDF\_DATE: 2012/3/12 12:10:00

The Partners module provides a page and a block for displaying links to the websites of cooperating organizations, together with short descriptions and optionally logos. Typical usage includes recognition of websites that refer a lot of traffic to your own and 'thank you' pages for sponsors.

This module has been originally refactored for Blue Move by ForMuss, and I have updated it for XOOPS 2.5.x

Please test and let us know any bugs you find.

While we would appreciate if you could test an update of existing Xoops Partners installations, please do it **ONLY** on test sites.

This is BETA release and as such, not meant for production sites.

**Download:** [XOOPS SourceForge SVN](#)

**Issues/Feedback:** [this thread in XOOPS Forums](#)
