## Module TDMCreate v1.38 Release Candidate - Modules

Posted by: timgno

Posted on: : 2012/4/10 12:00:00

Last release of the module [TDMCreate](#) to improve and decrease the time for creating new modules, using the new features for the automatic compilation of the code base required. Some parts of the code that was created in the previous version have been improved to avoid automatically write the code needed especially in administration.

### Release Notes:

- Fix some file creation const
- Code of default set out in Parts
- Changed the characters html attributes from \" to '
- Added code to pagenav in admin
- Added code to the list if there is no list
