## Profile 1.76

*Verbose Validation Edition*

Community Release by [Chronolabs Co-op](#)

Profile 1.76 is a version of *Profile module for XOOPS* that allows for a verbose registration to be done. It also allows for a Speed Test with the Speedtest module to be run before registration for user limits to be placed on internet speed for registering for a site.

This has a field for **validation** that allows for Text Match, RegEx or SQL Validation to be used to prevent people registering with your website without having validation data of sometype such as an existing email address or an invite code or some regular expression statement.

Featuring still Multiple Fields, 2 Types of validation - one which uses JSON; the other that uses the Field \$ POST validation method.

Simply upgrade your existing XOOPS 2.5 to XOOPS Profile 1.76 to experience the difference. We can really recommend *XinCodes 1.05* for a user based invitation to be done.

Now with IP Validation so an IP Address can be only used once to register. THIS means you can check you are not being signed up by an Indian SEO Sweat Shop and other such misbehaviour in signup.

**Example SQL Validation for a basis of pre-existing users email, remember to change 'prefix':**

```
Select count(*) from `prefix_users` where `email` LIKE "[value]" and `level` > 0
```

### New in this feature:

- Working SEO - htaccess
- Complete XOOPS 2.5 GUI

### Some Other Features:

- Downlink Speedtest Controlable of Registration
- Uplink Speedtest Controlable of Registration
- IPInfoDB Location Controlable of Registration
- Upgrade of Recaptcha Resource Files
- IP Address Field - *With Registration Validation*
- Proxy IP Address Field - *With Registration Validation*
- Netbios Address Field - *With Registration Validation*
- Recaptcha.net - *Remember to change the API Keys*
- Verbose Validation - *SQL or Match or RegEx Match Validation*
- Directory - *Browsable directory of users*
- Multifielded User Profiles - *Set your own variables*

Download: [xoops2.5\\_profile\\_1.76.zip](#) - **204 Kb**

Mirror: [xoops2.5\\_profile\\_1.76.zip](#) - **204 Kb**

Demo: *Pre installed at* <http://xoops.demo.chronolabs.coop> - *rememeber to upgrade the module.*
