

Converting your XOOPS1.x theme to work with XOOPS2 - Themes

NEWS\_PDF\_AUTHOR: onokazu

NEWS\_PDF\_DATE: 2003/2/7 7:12:04

Old themes will work fine in XOOPS2, however some parts (for example, tables and forms) do not look very good as they were in XOOPS1.x. This is because we have removed the .bg1-5 and .fg1-5 classes from CSS and now using the following CSS classes as replacements:

th  
.outer  
.head  
.even  
.odd  
.foot

Please read [this doc](#) on how these new CSS classes are defined and used in XOOPS2.
