

D-Transport, new module by Xoops Mexico - Modules

A new downloads module for XOOPS and RMCommon

NEWS\_PDF\_AUTHOR: bitcero

NEWS\_PDF\_DATE: 2013/2/3 7:05:39

I've recently released **D-Transport 2.0 Beta** for XOOPS, based on **Common Utilities**.

With **D-Transport** you can create a downloads section in XOOPS, with new and cool features that make the files management very easy and efficient.

This module contains a lot of features such as:

- ? Friendly URLs support. Very easy to configure.
- ? Multiple files by download item.
- ? Supports screenshots for items.
- ? A features manager.
- ? Statistics for items activity.
- ? Integrate with rmcommon features.
- ? Alerts for inactivity for items.
- ? and more...

You can see the module in action in the downloads section of [Xoops Mexico](#) (note that this is not a demo).

[Download the module.](#)

You can post your feedback, questions and comments in [this forum](#).
