

XOOPS2 RC2 released! - XOOPS

NEWS_PDF_AUTHOR: onokazu

NEWS_PDF_DATE: 2003/2/9 14:51:14

The XOOPS team is pleased to announce the release of XOOPS2 RC2 in which we have fixed numerous bugs that were in RC1 including:

- avatar upload bug
 - themeset image upload bug
 - register_globals fix
 - recommend us block error
 - error message displayed upon submit of news article
 - page navigation bug in some modules
 - blank page bug on some servers
 - SQL displayed in blocks admin
- and more...

Following packages are available for download:

- [Full package](#)

For new users and XOOPS 1.3.x users. This package contains entire XOOPS2 source and English language package. Please read [this article](#) for more information on XOOPS2. **Please ensure you read the INSTALL.html in docs/ before proceeding with installation or upgrade!**

- [Patch files](#)

For those who already have XOOPS2 RC1 running. This package contains only the files that have been modified from XOOPS2-RC1. To update from RC1, overwrite the old files with the new ones, then go to the modules admin page and 'update' the 'system' module.

- [Language files](#)

French, German, Italian, Japanese, Dutch, Portuguese, Romanian, Russian, S-chinese, Spanish, T-chinese, Vietnamese
