

XOOPS 2.5.6 RC 1 Released for Testing on PHP 5.4 - XOOPS

NEWS_PDF_AUTHOR: Mamba

NEWS_PDF_DATE: 2013/3/27 18:00:00

After **close to 45,000 downloads of XOOPS 2.5.5**, we're getting closer to release of our next version: **XOOPS 2.5.6**

As more and more hosts are switching to PHP 5.4.x, some of our users are having issues with XOOPS 2.5.5, since it was not certified for PHP 5.4.x

Therefore we will be releasing **XOOPS 2.5.6**, that will run without any problems on PHP 5.4.x

Please note: the fact that the XOOPS Core runs correctly on PHP 5.4.x, doesn't mean that all your modules will run correctly, therefore you'll need to test them.

However, the recently released modules that qualify for our [Basic Module Pack](#), are all tested on PHP 5.4.13, and they should run just fine.

There will be more modules coming soon (see [this list](#))

For all others, please let us know about any issues you might have.

Download: [SourceForge File Repository](#).

Please remember: This is RC Release version for features testing only!!!!

DO NOT install it on a production site and DO NOT upgrade any production site with it!!!

Please post and discuss all issues related to this release in [this thread](#)

XOOPS Development Team
March 27th, 2013

Changelog for RC1:

Quote:

Bugfixes:

- Array to string conversion (geekwright/mamba)
- issues with missing xoopscomments table (geekwright/sabahan/Mamba)
