Hello Xoopser !!!

Today, i want to show to you how it's easy to add a new plugin in the TinyMCE editor.
Why not try with the youtube plugin ?

Ok, sooooooo, let's go !

1) First, download the youtube plugin [here](#) (Zip File [here](#))

2) Extract zip and copy the directory /youtube in /class/xoopseditor/tinymce/tiny_mce/plugins/
in your XOOPS installation

3) Modify the /class/xoopseditor/tinymce/settings.php file

You could re-read the news [Using templates pages in modules](#).
The part 2 : "Add the template botton".

Add "youtube" in :
Line 70

```
"paste,fullscreen,visualchars,nonbreaking,inlinepopups,youtube",
```

Line 85

```
"theme_advanced_buttons4" =>  
"xoopsimagemanager,xoopsemotions,xoopsquote,xoopscode,xoopsmcontent,youtube",
```

4) That's All ! Now, Enjoy it

Maybe in the next XOOPS version it would be included by default...
