

Lexikon 1.51 Final Released - Modules

NEWS\_PDF\_AUTHOR: Mamba

NEWS\_PDF\_DATE: 2013/7/11 22:40:00

Lexikon is a module to create a glossary ordered by categories, with users participation who - among permissions - are allowed to send definitions or request for new entries.

Developed by Yerres, it has been now converted to XOOPS 2.5.6 GUI and tested on PHP 5.4.17

**Download:** [XOOPS File Repository](#)

Please report bugs and issues in [this thread](#)
