Portfolio module is a module originally developed by BitC3R0, that can be used for publication of your professional portfolio. The module let you create categories and works, in this way the visitors to your web site will know in detail the projects that you have worked on, and the work you've created.

You can add descriptions, information about clients, references and multiple images for every work you create. The users will learn your work portfolio in an easy and attractive way.

it has now been updated to XOOPS 2.5.6 Admin GUI, and tested on XOOPS 2.5.6 and PHP 5.5.1

Download: [XOOPS File Repository](#)

Requirements: XOOPS 2.5.6
