

WeBlog 1.47 Beta 1 available for testing on XOOPS 2.5.6 - Modules

NEWS\_PDF\_AUTHOR: Mamba

NEWS\_PDF\_DATE: 2013/8/25 21:20:00

**WeBlog** is a module to provide a personal Blogging/Journal system for XOOPS Users.

Originally developed by: Hiro SAKAI, ITOH Takashi, Rene Sato

New is this version:

- converted to XOOPS 2.5.6 Admin GUI
- added dynamic WYSIWYG editor selection in Preferences
- added directory checker

**Download:** in the [XOOPS SVN](#), click on the "Download Snapshot" link.

**Please report bugs and any issues [in this thread](#)! Thanks for testing!**

Also, the module is right now kind of plain looking, so we are looking for designers who would spice it up with some cool templates and make it look very cool! 🍷
