QRCode 1.2 module for XOOPS - Modules

NEWS_PDF_AUTHOR: chco2

NEWS_PDF_DATE: 2013/9/15 13:30:00

We've updated the QRCode module for XOOPS even further with **4** new protocols.

Added the support for:
- Business card (VCARD protocol)
- Make a Skype call or Instant Message
- Text to speech
- Bookmark a page

The QRCode module was first created so other developers could utilize QRCode creation. We then updated it so QRCodes could also be manually created.
Currently the module creates the following QRCode :

- Visit a website
- Call a phonenumber
- Send a SMS to a cellphone
- Plain text
- Send an email
- Lookup GPS coordinates
- Create a business card (MECARD or VCARD)
- Make a Skype call or IM
- Bookmark a page
- Text 2 speech

You can download it here.
