Thanks to **Bleekk** and the [XOOPS Germany team](#), we have now "Drag & Drop" incorporated into MyMenus Module.

In the picture below, you can see the links as bars that you can drag around to set the sorting, as well as the sub-links:

Also incorporated are changes from **Luciorota**, who added an option to use skins from the theme.

As always, it is great to see when developers are working as team and are helping each other! 🙌

Please test it and let us know if you encounter any problems.
