C-JAY Content - Modules

NEWS_PDF_AUTHOR: forlon

NEWS_PDF_DATE: 2003/2/19 11:02:40

Since Freecontent won't be upgraded by the original developer anymore. I am the one who takes care of it now. So I gave it a new Name and did some modifications.

Following modifications:
1. Content files (html) are now searchable inside Xoops 😁 😁 😁

2. Filemangement added to the admin section
3. You can add and delete the files now through the admin interface no need of ftp client anymore
4. Content is fixed to the content-folder inside the module
5. Put images or additional files to the fixed image folder

Download it here.
