

Common Utilities 2.2.7.5 for XOOPS 2.5.7 released - Modules

NEWS_PDF_AUTHOR: Mamba

NEWS_PDF_DATE: 2014/11/14 8:50:00

Eduardo Cortés (aka [BitC3R0](#)) has just released [Common Utilities 2.2.7.5](#) for **XOOPS 2.5.7**

As every creation of Eduardo, this module is an amazing work! There are too many fantastic features to mention, but some that are really cool are:

- One-Click Updates
- URL Rewriting
- Form Fields
- Custom Codes
- Configuration System
- in-Line Docs
- Plugins Support

This module is for the current **XOOPS 2.5.7**, but the most important news is that Eduardo is **starting to integrate the visual behavior of Common Utilities to [XOOPS 2.6.0](#) !!!**

Once ported to XOOPS 2.6.0, you can consider it as the "Presentation Layer" for XOOPS 2.6.0! The plan is to use it as the foundation for all future modules of XOOPS 2.6.0+. Combined with all the great work done on XOOPS 2.6.0 Core by Richard (Geekwright), and previously by Nicolas (ForMuss) and Ricardo (Trabis), this will be a XOOPS like never seen before.

So go and check it out on your XOOPS 2.5.7, let us know if you like the direction XOOPS is heading!
