

QuickPages 2.0 RC available for download! - Modules

NEWS_PDF_AUTHOR: Mamba

NEWS_PDF_DATE: 2014/11/15 23:57:45

Eduardo Cortés (aka [BitC3R0](#)) has just released [QuickPages 2.0 RC](#) for **XOOPS 2.5.7**

QuickPages module belongs to a new generation of modules for XOOPS based on [Common Utilities](#). This allows you to better utilize all the cool features currently provided by XOOPS and the power and beauty offered by [Common Utilities](#).

QuickPages allows you to create semi-static pages easily and quickly. It is ideal for Landing Pages, Sales Pages and any other Marketing site. You can create a single or a few pages, or even a full Website.

QuickPages support templates for every page. That means that you can provide to your pages an incredible appearance and functionality.

These are some of the QuickPages features:

- Single pages
- Home pages
- Standalone pages
- Categories organization
- Templates for pages

Requirements:

[XOOPS 2.5.6 or 2.5.7](#)

[Common Utilities 2.2](#)

[AdvancedForms for Common Utilities](#)

Installation;

Install QuickPages normally, as any other module for XOOPS and Common Utilities.

Download: [click here](#)
