

Ethernial: a new freemium theme for XOOPS - Themes

NEWS_PDF_AUTHOR: bitcero

NEWS_PDF_DATE: 2014/12/24 20:30:00

Introducing a new theme made by me: [Ethernial](#)

Ethernial is a modern and good looking theme designed using [xThemes](#) and Bootstrap. It is inspired on other theme by [HTML5 UP](#).

Features:

- A full featured configuration panel.
- Automatically compiling of less files that build bootstrap and theme styles.
- Customization of colors and images (general appearance).
- Support of custom CSS code via configuration (*forget to modify files directly to customize certain parts of theme*).
- Fully integration with **MyWords**, **Professional Works** and **QuickPages**
- A totally new block for twitter feed (*using the rmcommon blocks sytem*).
- You can choose between show blocks at left or right of theme.
- Two blocks zones: sidebar and footer.
- A lot of more things...

Requirements

If you wish to use Ethernial, then some components are required:

1. [Common Utilities](#)
2. [xThemes](#)

3. [MyWords](#)
4. [Professional Works](#)
5. [QuickPages](#)
6. [Advanced Forms](#)
7. and, of course, XOOPS
