## Favicon Generator Module - Modules

Posted by: Runeher

Posted on: : 2015/2/11 23:04:55

As I said in the [last post](#), some new modules are being made available to the XOOPS community, and first out is a Favicon Module. Originally it was meant as a commercial module, but when I first started using XOOPS, way, way back there, everything was FREE, which I loved. So in that spirit... ;)

It comes with admin section, hidden counter, and language files.

Option to delete created favicons, and reset counter.

Offer your visitors the opportunity to create their own Favicon from your site.
