

Newoni, a new free theme - Themes

NEWS_PDF_AUTHOR: vamptrix

NEWS_PDF_DATE: 2015/3/7 5:47:04

I'm thrilled to announce my first new XOOPS theme in a few years!
It's been a long while, but I hope this one is worth it ;).

I present to you... Newoni!

Newoni is built upon the wonderful **xbootstrap** which is a wonderful base template to use (if you are familiar with Bootstrap, which unfortunately I'm not :P).

The design itself has been heavily inspired by the current Neowin website.

Features

- * Responsive design
- * Included image slider
- * Modified login block template
- * Modified search block template
- * And many others.

Demo

My demo site is currently not yet ready, but once it is I'll post it in the comments below.

Download

You can download Newoni for free on the Github repository: <https://github.com/kevjoe/xoops-newoni>

If you prefer a direct download link, [you can click here](#).

Please keep in mind that Newoni is being released as a work in progress. It's ready for usage on any website, but not all templates have been styled as much as I like them to be. I however couldn't wait to release it ;).

Support

If you've got any questions about Newoni, feel free to ask me about them below, or mail me on kevin@kevjoe.be.
