We are very happy to let you know that Eduardo has started to work on the "Presentation Layer" in XOOPS 2.6.0, using his fantastic Common Utilities as basis to merge them into the Core

We all know and love the work done by Eduardo over the years, and therefore we know that XOOPS 2.6.0 will have an awesome Admin GUI for the Core and for the modules!

More info and screenshots are on [GitHub XOOPS](#), as well as the follow-up discussion.
