Laurent JEN (aka DuGris) has developed couple of years ago six very nice modules for XOOPS 2.6.0

I've started updating them to reflect the changes done to XOOPS 2.6.0 Core since then, and they are now on [GitHub in the XOOPS 2.6.0+ Modules section](#).

Clearly, the update is still work in progress and some of the modules don't work yet properly due to the changes in Core, but hopefully soon they will become more stable. Of course, as always, you can fork them and help us with the development! 😊

Please note that the next version of XOOPS is being **actively developed** on [GitHub](#), and you're encouraged to fork it, test it, and contribute back! 😊
