

New Friendfinder 3.10 - Modules

NEWS_PDF_AUTHOR: eagle81

NEWS_PDF_DATE: 2003/2/23 17:45:54

Hi @all,

I know that it took some time for the friendfinder release. You will find new features and bugfixes. Please read the readme.txt if you like to upgrade your existing friendfinder run upgrade.php. Please be careful with updating and try it first on your local machine.

Changelog:

What has been changed in the friendfinder with the new version 3.10:

- add.php pic.php new upload mechanism which should allow uploading in php safemode and index.html will also be added for every new folder
- add.php when user already has a profile he won't get access to this page.
- index.php user will only see the links he needed and that he can use.
- search.php has been completely re-written.
- view.php has been completely re-written.
- gpl licence included.
- directfriends integration for friendfinder.
- pictures can be changed for the complete module in the admin area.
- Polish lang files included
- French lang files included
- Italian lang files included
- Chinese lang files included
- Portuguese lang files included
- admin area main config admin can now allow/disallow profiles editing, deleting profiles and picture upload
- Possibility to say if country could be added or searched
- Bugfix XoopsCodec does not work this bug has been fixed.
- generateimg.php has been implemented therefore the gd library is needed.
- UPGRADE SCRIPT FOR OLDER FRIENDFINDER VERSIONS 3.0x has been written.

Greetings Manuel alias eagle81

Hi @all,

I know that it took some time for the friendfinder release. You will find new features and bugfixes. Please read the readme.txt if you like to upgrade your existing friendfinder run upgrade.php. Please be careful with updating and try it first on your local machine.

Changelog:

What has been changed in the friendfinder with the new version 3.10:

- add.php pic.php new upload mechanism which should allow uploading in php safe mode and index.html will also be added for every new folder
- add.php when user already has a profile he won't get access to this page.
- index.php user will only see the links he needed and that he can use.
- search.php has been completely re-written.
- view.php has been completely re-written.
- gpl licence included.
- directfriends integration for friendfinder.
- pictures can be changed for the complete module in the admin area.
- Polish lang files included
- French lang files included
- Italian lang files included
- Chinese lang files included
- Portuguese lang files included
- admin area main config admin can now allow/disallow profiles editing, deleting profiles and picture upload
- Possibility to say if country could be added or searched
- Bugfix XoopsCodec does not work this bug has been fixed.
- generateimg.php has been implemented therefore the gd library is needed.
- UPGRADE SCRIPT FOR OLDER FRIENDFINDER VERSIONS 3.0x has been written.
