Eduardo (aka Bitcero) just shared a picture of his new Admin theme he is working on for to XOOPS 2.6.0. It is called "Helium" and as you can see below, it looks AWESOME!!!! 🤖

You can see it in a full glory and detail on [GitHub](#)

Eduardo is a true artist, and I love the fact that the them is using colors and that even the icons are also with colors! Too many CMS projects are using only one color for the theme, with all icons being in another color. That's way too boring! 😞

Please help us with testing and with contributing to the next version of XOOPS!!!! 🤖
