

New module wgXPiwik - Modules

NEWS\_PDF\_AUTHOR: goffy

NEWS\_PDF\_DATE: 2016/5/15 23:49:10

Dear Xoopers

I would like to present my latest module wgXPiwik:  
This Xoops module implementes Piwik for your XOOPS website.

- Piwik is included in the module
- Installing Piwik can be started from module, but you can't admin Piwik itself (create user, admin user rights,...) via this module. You have to use Piwik Admin GUI.
- You can provide Piwik Charts/Widgets via iframe on user site. As Piwik function 'logme' is used, therefore no separate login for your users is necessary.
- The permissions for XOOPS User you can set per group in the module
- Tracking will be done via a block. Therefore you can activate tracking only for specific modules, all modules or only the Start-page.

**Detailed tutorial:** <https://www.gitbook.com/book/xoops/wgxpiwik-tutorial/details>

Github: <https://github.com/ggoffy/wgxpiwik>

**Download:** <http://xoops.wedega.com/modules/TDMDownloads/singlefile.php?cid=1&lid=8>

For detailed information about Piwik and widgets of Piwik goto <http://piwik.org>
