

Exam/Assessment Module for XOOPS 2.5.8 and PHP 7 - Modules

NEWS_PDF_AUTHOR: Mamba

NEWS_PDF_DATE: 2016/6/28 13:43:40

This module enables you to create questions, answers and group them all together to create an Exam/Assessment.

It was originally created under the name "Nivelamento" by our dear friend [Marcello Brandão](#) from Brazil, known in the XOOPS community as "**suico**" or "**marcellobr**", who unfortunately passed away several years ago

I've refreshed it a little bit for XOOPS 2.5.8 and PHP 7, and hopefully we'll get few members from the community who will help us with further improvement of this module.

There are also several other Test/Quiz/Exam modules that could be actually merged together to create something really cool! 😊

Download: [GitHub](#)

Development: Please help us with the development, you can [fork this module on GitHub](#):

Tutorial (work in progress, needs help): on [GitBooks](#)

You can help us by contributing to the [Tutorial on GitHub](#)
