

References Module 2.0 Beta 1 for XOOPS 2.5.8 available for testing - Modules

NEWS_PDF_AUTHOR: Mamba

NEWS_PDF_DATE: 2016/7/6 19:15:41

XOOPS References is a module that will allow you to create an unlimited number of customer references, which you can categorize any way you want.

The key features of each reference that you create:

- RSS Feed of recent references
- Modern display with accordion effect and "Lightview"
- Choice of the text editor to use to create references
- Automatic creation of thumbnails of each screenshot
- Ability to use a keyword system (TAGS)
- Possibility to activate a notification when creating a new reference
- Integration with XOOPS
- Ability to clone module
- Cache Management to improve performance on a heavily used environment
- Management of permissions categories

The module, originally developed by Hervet, has been updated for **XOOPS 2.5.8** and **PHP 7**
