Just wanted to let you know that I have added to GitHub few old [Happy Linux modules](#) created by Kenichi OHWADA, as I started to work on updating them for XOOPS 2.5.8. and PHP 7. They are now in our Archive of old modules:

[https://github.com/XoopsModulesArchive/happy\\_linux](https://github.com/XoopsModulesArchive/happy_linux)  
<https://github.com/XoopsModulesArchive/timeline>  
<https://github.com/XoopsModulesArchive/weblinks>  
<https://github.com/XoopsModulesArchive/webmap>  
<https://github.com/XoopsModulesArchive/webmap3>  
<https://github.com/XoopsModulesArchive/webphoto>

I've forked them to my repository and had already a first conversion attempt, so if you're interested, you can take a look:

[https://github.com/mambax7/happy\\_linux](https://github.com/mambax7/happy_linux)  
<https://github.com/mambax7/timeline>  
<https://github.com/mambax7/weblinks>  
<https://github.com/mambax7/webmap>  
<https://github.com/mambax7/webmap3>  
<https://github.com/mambax7/webphoto>

Anybody who is using them, is welcome to contribute, so please fork them, and start sending some improved code! 🙏

Please note: these modules are not planned to be officially supported by me, i.e. I am not going to spend much time on them. But since this week I was doing a lot of conversions of older XOOPS modules, I thought, I'll give it a try... 😊
