XoopsInfo & XoopsCare for XOOPS for XOOPS 2.5.8 & PHP7 - Modules

NEWS_PDF_AUTHOR: Mamba

NEWS_PDF_DATE: 2016/7/8 20:38:20

I started to update two modules for the Admins for XOOPS 2.5.8 and PHP7.

They are now in more or less "Alpha" stage, so they are definitely NOT for a "production site", but hopefully some of you could take a look and contribute to it, so they could move to Beta and then be released as "Final" 😁

XoopsCare provides some basic maintenance tasks for the Website Administrator, to accomplish them easily and automatically.

Download: GitHub

Tutorial: GitBook

You can contribute to the tutorial on GitHub here

XoopsInfo is an administration module that provides a bit of useful administrative information to your fingertips. Every site should have access to this information.
