

Adminer 3.1 Beta 1 for XOOPS 2.5.8 & PHP 7 Released - Modules

NEWS_PDF_AUTHOR: Mamba

NEWS_PDF_DATE: 2016/7/19 21:10:00

The **Adminer Module** provides SQL Management for XOOPS from inside the Admin Panel. It includes three tools:

a) [Adminer](#)

Quote:

Features:

- Connect to a database server with username and password
- Select an existing database or create a new one
- List fields, indexes, foreign keys and triggers of table
- Change name, engine, collation, auto_increment and comment of table
- Alter name, type, collation, comment and default values of columns
- Add and drop tables and columns
- Create, alter, drop and search by indexes including fulltext
- Create, alter, drop and link lists by foreign keys
- Create, alter, drop and select from views
- Create, alter, drop and call stored procedures and functions
- Create, alter and drop triggers
- List data in tables with search, aggregate, sort and limit results
- Insert new records, update and delete the existing ones
- Supports all data types, blobs through file transfer
- Execute any SQL command from a text field or a file
- Export table structure, data, views, routines, databases to SQL or CSV
- Print database schema connected by foreign keys
- Show processes and kill them
- Display users and rights and change them
- Display variables with links to documentation
- Manage events and table partitions (MySQL 5.1)
- Schemas, sequences, user types (PostgreSQL)
- Extensive customization options

b) [Adminer Editor](#)

Quote:

Features:

- Interface to select and edit data ready for your client
- Table and column comments are displayed instead of identifiers
- Separate set of login credentials different from the real database user and password
- Single database per one instance of Editor
- Links to referenced records
- Works with the name of a referenced record, not its ID
- Displays images stored in BLOB
- Displays checkbox and icons for BOOL
- Uses national format for DATE
- Allows sending messages to e-mails found in table
- No edit or display of SQL commands (only in HTML comment)

c) **BigDump** from [Alexey Ozerov](#) for import of large and very large MySQL Dumps (like phpMyAdmin dumps) even through the web servers with hard runtime limit and those in safe mode.

The module was originally developed by Kris_fr from XOOPS France, and now has been updated for **XOOPS 2.5.8** and **PHP 7**

Some of the changes in 3.1:

Quote:

- Update: Adminer 4.2.5
- Update: Adminer editor 4.2.5
- Update: BigDump 0.36b
- added Admin GUI and moved the apps there
- renamed .html templates to .tpl (mamba)
- moved images to /assets
- added /help

- updated Adminer plugins
- added more Adminer plugins: dump-bz2, dump-json, edit-calendar, FasterTableFilters
- Unnecessary double quotes
