Release of xmcontent version 0.21 - Modules

NEWS_PDF_AUTHOR: Mage

NEWS_PDF_DATE: 2016/8/20 7:10:00

I am pleased to announce the release of **xmcontent 0.21 final**!

Xmcontent is a simple content module for XOOPS. This module allows create content pages.
The main point on the module:
• Individual permissions for all contents.
• Keywords (SEO) per content editable.
• Description (SEO) per content editable.
• Header and footer Customizable on the module home page.
• Selection xoops editor.

What's new in version 0.21:
• Use a css file personalized by content (you can add a custom css to a content).
• Use a template file personalized by content (you can add a custom template to a content).
• The XOOPS search is integrated.
• A short description of the content is available on the module home page

This is only the beginning, if you have suggestions for future versions is here:suggestions

Download: Releases
Bugs: Issues

The modules are optimized to run on the 2.5.8 version of XOOPS, but it works on 2.5.7.

Important: The templates use Bootstrap, so you must use a Bootstrap theme, e.g. xBootstrap
that comes with XOOPS 2.5.8
