

MyMenus 1.52 Final, with Drag & Drop, Is Released - Modules

NEWS\_PDF\_AUTHOR: Mamba

NEWS\_PDF\_DATE: 2016/9/13 13:50:00

**MyMenus 1.52 Final** for XOOPS 2.5.8+ and PHP 5.5+ (incl. PHP 7) has been released - this release fixes issues with static methods discovered by Goffy.

Thanks to **Bleekk** and the [XOOPS Germany team](#), we have now "Drag & Drop" incorporated into MyMenus Module.

In the picture above, you can see the links as bars that you can drag around to set the sorting, as well as the sub-links:

Also incorporated are changes from **Luciorota**, who added an option to use skins from the theme.

As always, it is great to see when developers are working as team and are helping each other! 😊

**Download:** [GitHub](#)

**Issues/Bugs:** please report them directly on [GitHub](#)

As always, we encourage everybody to fork it and help us by contributing back to the development.

**Development:** [GitHub](#)

**Tutorial:** [GitBook](#)

You can contribute to the tutorial, as well as provide translation, on [GitHub XOOPS Docs](#)
