All,

I have finished a forum hack supporting the following:

adds 4 optional behaviors and a preferences page to configure options...

- 1) make private forums searchable (for users that have rights) while hiding private forums from users with no rights altogether
- 2) allow forum rights assignment by groups
- 3) allow moderators to automatically receive posts via e-mail
- 4) allow users to monitor forums by receiving posts in e-mail

please report bugs or questions on forums [On My Site](#)

I hope that this helps!
