The XOOPS team is pleased to announce that the 3rd release candidate version of XOOPS2 has been released.

This package includes numerous bug fixes and a number of security based enhancements which fixes possible cross site script and SQL injection vulnerabilities. Therefore all users that are currently running XOOPS2 RC2 are STRONGLY ADVISED to upgrade as soon as possible.

Changes

=====

- a major change in the handling of theme files, the detail of which you can read in this [article](#) (Onokazu)
- a new global notification feature that can easily be incorporated into modules (that use Smarty) by only modifying xoops_version.php and template files (mvandam)
- SMTP support using phpMailer (bunny)
- group permission tables merged into one table (Onokazu)
- code refactoring

Install
