I am pleased to announce the new Xoops2 incarnation of [inter\face magazine](#). Inter\face specializes in new and experimental writing.

I moved to Xoops in attempt to build a stronger, more interactive community that can give direct feedback to the writers. I am hoping that in the future Xoops will develop a meta-moderation system something like what Scoop (kuro5hin.org) uses, so that the "selection" of "submissions" can be effectively done by the readers.

I am also anxiously awaiting the release of WF-sections so that I can import all of the legacy magazine material.

Feel free to visit and contribute! I welcome comments and suggestions.
