

Module HowTo Available - Developer News

NEWS_PDF_AUTHOR: CoolPops

NEWS_PDF_DATE: 2003/4/14 9:14:58

Recently switching to Xoops, I soon found that to develop a module was a little bit difficult for the new Xoops develop due to a lack of a simple How To. I managed to read the source code and after some time make my own module work.

So that you don't have to learn the hard way, I created a simple module howto. The module is called Greeter, and it's purpose is to greet! It does nothing more than that. But you are taken step by step through the creation of the module and in the end, you have the basis for any module you wish.

You can view the How To by visiting: <http://wiki.xoops.org/wakka.php?wakka=ModuleHowTo>
