The bug is, If you set the XOOPS_USE_MULTIBYTES to 1 in the /language/yourlanguage/global.php, then, the "Length of the title" of "Recent Downloads" block, quit work.

Hint: The "Length of the title" of "Recent Downloads" block, can be modified in the [Blocks Administration] » » [Edit a block].

How to fix it:

Open the /modules/mydownloads/blocks/mydownloads_top.php file, go to line 46, and change these lines

```
if ( !XOOPS_USE_MULTIBYTES ) {  
    if (strlen($myrow['title']) >= $options[2]) {  
        $title = $myts->makeTboxData4Show(substr($myrow['title'],0,($options[2] -1)))."...";  
    }  
}
```

to

```
if ( !XOOPS_USE_MULTIBYTES ) {  
    if (strlen($myrow['title']) >= $options[2]) {  
        $title = $myts->makeTboxData4Show(substr($myrow['title'],0,($options[2] -1)))."...";  
    }  
}else{  
    if (strlen($myrow['title']) >= $options[2]) {  
        $title = $myts->makeTboxData4Show(substr($myrow['title'],0,($options[2])))."...";  
    }  
}
```

Okay, now it works well for multibyte language users.
