Easy Theme has been released to the public who wishes to beta test it. It is in beta and things will change, but I would appreciate user feedback.

Easy Theme is a simple, clean, efficient, and fast theme with the ability to very easily change the colors. This is possible because of the separation of the layout stylesheet and the color stylesheet. For this reason, you can create a new theme and completely customize your colors in a matter of minutes.

You can see it's use, discuss it in the forums, and download it all on <http://cowgar.com>
