

XOOPS 2.0 Admin Menu Icons - Themes

NEWS_PDF_AUTHOR: Rooster

NEWS_PDF_DATE: 2003/4/24 14:29:19

Hello all. I have created four Menu icons for use with phpMyAdmin, eCal, and C-Jay Content following the howto by xoopldap. Of course, he's a lot better at it than I am. 😊

However, they are more than just functional. The images are supplied in PNG format, which means that you can redesign them if you choose. Two of the icons were designed for phpMyAdmin, and one for each of the others, using Macromedia Fireworks. They can be downloaded [here](#). Enjoy!
