Bug fix: bad_user_name setting in "User Info Settings" - Developer News

NEWS_PDF_AUTHOR: kanaka

NEWS_PDF_DATE: 2003/4/28 18:23:51

The bug is:
 In the "User Info Settings", there is a setting named "Enter names that should not be selected as username", but this function doesn't work.

How to fix it:
 Edit the file /register.php, go to line 83, and change "bad_emails" to "bad_unames".

(You may possibly worry about the Email verification, well, just set your heart at rest, the Email verification code is the lines begin from line 50.)
