

loalfoo.net pre-switch from postNuke to Xoops 2 - YAXS

NEWS\_PDF\_AUTHOR: MosesTycoon

NEWS\_PDF\_DATE: 2003/5/2 16:12:41

### Dear Community,

after almost two years of php- and postNuke, time has come to give Xoops a chance to make it for the next two years 🍷

This is a preview of th upcoming [localfoo.net](http://localfoo.net). Preview because of some cosmetic changes which have to be done during next weekend (of course some more skinning...)

I started this switch because I can't see any developing going on with postNuke and by the way Xoops 2 has some very cool features, once you establish you don't want to miss anymore.

So thanks for your great work, and see ya @ [localfoo.net](http://localfoo.net)

[size=x-small]Home of the TSW [The Saint WAMP] and german ressource for WAMPS and its components: Apache, MySQL & PHP
