

PHP IDE - Developer News

NEWS_PDF_AUTHOR: lykoszine

NEWS_PDF_DATE: 2003/5/7 14:09:46

"Dev-PHP is a full-featured integrated development environment (IDE), which is able to create scripts and applications using the PHP scripting language and the PHP-GTK library (both included in the "PHP Package"). Dev-PHP is free software under the GNU General Public License, which means you can freely modify or use the source code under the terms of the license. "

Have not really spent much time using this yet, but at first glance seems very nice.
