After two weeks of pain and headaches, I'm happy to report that [EclipseMagazine](#) has been upgraded and is now running on X2.02. So come and check us out and let me know what you think. And hey while you are there you could probably win a Free DVD.

Also please try the registration functions, I want to verify that they work and users are able to register on the site.

Again here's the link <http://www.eclipsemagazine.com>

thanks!
