Hi,

In [the article posted by malexandria the 2003/6/10](#) on <http://www.xoops.org> he regretted the lack of English support for the themes xoops.

I work already on the translation of tutorials created on the french version. I hope that this site becomes the "official" site of the new "theme development team".

The url of the new english support web site is <http://www.xoops-themes.org>. It should be available in 12-24 hours (sorry - DNS)
