

TinyEvent v1.0 released! - Modules

NEWS_PDF_AUTHOR: chapi

NEWS_PDF_DATE: 2003/6/17 16:10:19

Some of you may remember the TinyEvent Calendar. Now it is back and working with Xoops 2.0.x! You can get it in the downloads section here at xoops.org!

This calendar is pretty good for sites with less events, who don't want to display a month view for only two events by example.

This calendar works with `register_globals=off`, is integrated into the xoops search and makes use of the xoops timezones.
