Greetings,

I am glad to present my new project to you: CMS design (themes) studio, we exist about one month and have issued some sites on xoops and xoops 2. Development by that and to other portals is possible also. Also from recent time we have begun to let out free-of-charge themes which you may load from our site.

[AICol Studio](#)

Site on Russian, but specially for you added article and forum in English, so if you'll have any questions, we'll answer by all means.

We'll be glad to see you our client.

FYI.. I checked the site and they have one theme for X2 so far.
