Hello everyone,

I've made a new theme called "xthemes".

The Original theme is Created by Xend ([Http://www.xoops.no/](http://www.xoops.no/))

Converted to xoops2 by Gilian (<http://www.websitetotaal.info/>)

It's an orange/white + little darkgreen in the top theme.

If you find any bugs please report them to me.

Download available at the downloads section of this and mine site.

Greetings
